

Sprint 1 Report

Product Name: LiveColor

Team Name: Harmony

October 20th, 2019

Actions to stop doing:

- Stop communication problems regarding meeting times. We had some initial problems getting everyone together for the meetings and presentation on time. Now that we have a weekly schedule the problem will likely cease.

Actions to start doing:

- Team should start to figure out how to get color codes off images, since that's the main chunk of the project and we have a basic UI set up.
- Develop the less basic UI for how colors are displayed once picked

Action to keep doing:

- Team should keep learning android as we go, since there's always something new that we won't know how to do.

Work completed:

- Project set up on Github, all members have access
- A basic UI that allows us to go to different fragments/activities
- Able to open the camera from the app via button (We decided to scope down from a live, internal camera to an external camera)
- Learning some of the basics of android studios

Work not completed:

- Learning android studio, always something new we will have to pick up along the way

Work completion rate:

- Number of user stories completed: 2
- Number of estimated ideal work hours completed: 17
- Number of days in sprint: 14
